

Event logistics

Promotions logistics. A clever combination of **experience with events** and expertise in transport.

Trade fairs, VIP events, roadshows – the success of your on-site presence depends on how you prepare. That's where we come in – with our experience as a transport and warehouse logistics specialist combined with the agility of our high-performance event logistics tool.

The result? Presentations that leave a lasting good impression.

Staging trade fairs, exhibitions, sponsorship commitments and other events professionally takes qualified employees. Or – you let our event logistics professionals take care of it. We make sure that all you have to worry about on day X is the well-being of your visitors.

Event material and an eye on your events

Our web-based event logistics tool lets you see all your infrastructure and consumables – pens, T-shirts, screens, stand elements and bar stools, etc.

- Access event materials around the clock from your tablet, smartphone or desktop
- Review the sequence of all events
- Get a list of missing materials, repairs, stock and inventory

Simple, automated ordering

The user-friendly web-based item catalogue helps you book your event materials in good time for your next presentation and reduce material losses.

- Reorder consumables well in advance
- Coordinate operations, save time, prevent errors and optimise costs
- View item details with product images, packaging and transport data and prices

Talk to us about your plans

Would you like to find out more about our event logistics? We look forward to hearing from you.

Outsource your (interim) storage

We store your materials in a warehouse at a location in Switzerland ideally suited to you, keep your goods in good condition, clean them and prepare them for the next use.

- We process orders professionally based on your set-up lists and specifications
- If you wish, we can also automatically inform you of any missing materials
- Identify availability conflicts with later orders at an early stage

Optimise transport and on-site presence

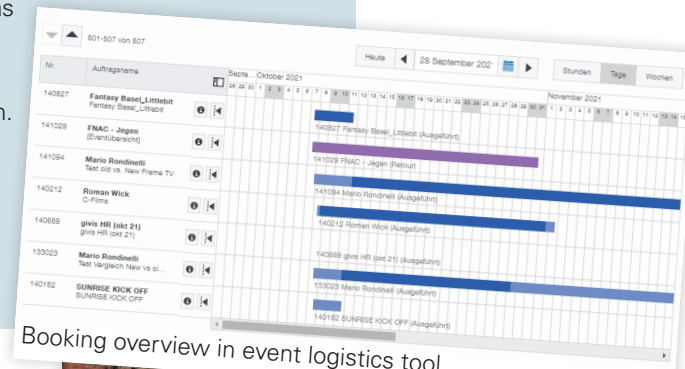

As soon as your event location is accessible for exhibitors and stand builders, we carefully transport the materials you order to the venue.

- Get additional muscle for setting up, assembling, wiring and powering up
- Coordination with your stand builders and technical staff is ensured
- We promptly deliver any missing parts with «Planzer Parcel» or Quali-Night AG

Keep IT transparent and measurable

You don't need in-house technological infrastructure for our event logistics tool. The software was developed in Switzerland and runs through a modern Swiss data centre.

- API allows interfaces with other systems
- With your requirements in mind, we are constantly expanding the range of functions and the security concept
- User rights and responsibilities can be individually configured
